

Any increase in ownership by the media conglomerates will be detrimental to the hundreds of small business owners who service the media space. I have built broadcast studio systems for 20 years, am a life-long republican, and active in my

local party. The large media companies increasingly treat their vendors in an oligopolist manner, additional consolidation will lead to dozens of small firms who

supply them being either starved out, or bought out. Please do not pass the proposed changes it will put hundreds of people in the suppliers out of work. I would be happy to send you more detail if you wish.
